What is an Adult Training Course?

The Adult Training Courses (ATC) are an offer of education and training for adults who want to raise their qualifications. These courses are developed according to dual certification courses and, when appropriate, to the profile and life history of adults, only for school qualification.

Adult Training Course- Secondary Level

For Whom?

Adults who already hold the 3rd cycle of basic (9th grade) education or secondary education who wish to obtain a double certification may, when appropriate, develop only the technological training component of the corresponding ATC (Adult Training Course)

Adult Training Course - Structure

In Portugal, we have to follow a base structure and the National Qualifications Catalogue, created by the National Agency, that provides guidelines on how to build / create a certain course that follows the scheme that I present below. This base serves for the Training courses and for the process of certification of competencies.
